## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 2, 7-9, with the allowable features being; the specific lenses and the order they are in(claim 1) the conditional formula pertaining to the power of the fourth lens(claim 2); the conditional formula pertaining to the distance to an exit pupil from an image surface(claim 7); the conditional formula pertaining to the F number(claim 8); the conditional formula pertaining to the minimum axial thickness of the plastic lenses(claim 9). Therefore claims 1-14 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## **Conclusion**

Art Unit: 2873

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Maruyama(U.S. Patent No. 5,969,862) and Maruyama (U.S. Patent No. 5,796,520) are pertinent to the application since they pertain to an aspherical lens for focusing light.
